Proposition 2.1 & Theorem 2.1: Cubic Moore Bounds $n_0(3, g)$ vs. Exact $(3, g)$-Cage Orders
Cubic Moore Bound $n_0(3, g)$
Exact $(3, g)$-Cage Order $f(3, g)$
Open 64-Bit Cubic Frontier ($50 \le n \le 64$)
Vertex Count n ($\log_2$ scale)
Girth $g(G)$
